- Team Performance Award (2015)

Education

Master of Computer Applications
Indira Gandhi National Open University
Graduated in June 2016

Bachelors in Computer Applications
Berhampur University
Graduated in June 2010

Interests

- Playing & Following Cricket
- Travelling & Capturing Landscapes
- Riding bikes

Professional Experience Summary

Lead Engineer at Macquarie Group, Sydney

Feb 2022 - Present

I'm contributing to the solution, architecture and delivery of the entitlements platform (Customer access management), which powers the online and mobile banking services and consents for open banking - Consumer Data Right (CDR). Below are some of the highlights:

- Spearheaded migration of millions of banking entitlement records to the strategic platform for personal & business banking.
- Implemented data reconciliation solutions to streamline processes and ensure accuracy.
- Introduced diagram as code for architecture documentation, enhancing clarity and efficiency.

Principal Engineer at Insurance Australia Group (IAG), Sydney

May 2021 - Feb 2022

I worked as a consultant at Insurance Australia Group (IAG). Below are some of the highlights:

- Developed solutions for unified branding across Australia for IAG, i.e. NRMA in all states.
- Implemented code coverage reports in CI pipeline and created CI/CD pipelines for UI applications.
- Migrated application workloads from RHEL-7 to RHEL-8.

Principal Engineer at Aegon Life Insurance Company (ALIC), India

Feb 2019 - Dec 2020

I architected and built a cloud native policy administration solution on AWS with a lot of agility in a startup like environment. Below are some of the highlights:

- Collaborated with CTO and key stakeholders to design and build a cloud native policy administration solution on AWS from scratch.
- Built a multi-tenant policy administration system with B2B insurance sales via APIs, enabling onboarding of e-commerce platforms which helped increase the customer base and the brand recognition.
- Built the solution which supported policy quotations, policy proposals, policy renewals, customer data and entitlements management, customer correspondences for retail, group and employer lines of business (which includes all the software application tiers of apis, presentation layer, core services, integrations, transactional databases and data products for data lake)
- Led and mentored multiple squads of software engineers from Aegon Life, Saksoft & Thoughtworks.
- Grew the engineering team in quantity and quality.
